

FT-ZERO Series

FULLY-AUTOMATIC MEASURING SYSTEM

ARS-F

Auto-Focus, Auto-Reading, Auto-Stage

Light-and-dark image processing protects this system against the influence of metals or damage.

Automatic measurement can be done with high accurate repeatability exceeding any skilled technician.

ITEM	ARS-F
SYSTEM CONFIGURATION	1.3M or 5M Pixel camera, Camera attachment, personal computer, printer, 23-inch LC monitor, connecting cable, exclusive control, and data processing software
MIN. MEASUREMENT UNIT	0.1 μm
MEASUREMENT SCALE	HV (Vickers), HK (Knoop)
MEASURING METHOD	Light-and-dark image processing system
REPEATABILITY	±0.5% / approx. HV500 Load:500gf
MANUAL MEASUREMENT	Video line system
AUTOMATIC READING TIME	Approx. 0.3 sec / 1 indentation
MIN. READ INDENTATION DIAMETER	10 μm (×50)
AGE DIMENSION	X110 × Y110 (mm)
STAGE MOVEMENT	X50 × Y50 (mm) × Z-axis with joystick controller
MIN. STAGE MOVEMENT UNIT	1 μm
DATA PROCESSING	Graph display, color conversion data, maximum value, minimum value, average, conversion, hardened layer depth, etc.

- Applicable models
- FM-110
 - FM-110e
 - FM-310
 - FM-310e
 - FM-810
 - FM-810e
 - FV-110

 - FV-310
 - FV310e
 - FV-810
 - FV-810e

- By combining with Hardness Tester, stage control is automated in indent/multi-point measurement to reduce the dispersion caused by each operator.
- This system is very effective for large-scale rationalization and energy saving.

LOAD-CELL TYPE AUTOMATIC VICKERS HARDNESS TESTER

FLV-AR Series

Fully-Automatic Microhardness / Vickers Hardness Testing System has been evolved!!

- Innovative elevating type head and wide test load range is adopted.
- Advanced intelligent system of high speed sample profiling function.
- Improvement of high speed, high accuracy, excellent in operability, reading efficiency and repeatability.
- Reliable hardness test as close as human eyes and sensitivity.

Features

Load-cell type loading mechanism

- 15 steps test load and additional test load can be optionally set by "unit 10g".
- There are 2 models. 10gf ~ 10kgf (FLV10) and 50gf ~ 50kgf (FLV50)

Load apply mechanism by elevating type head

- Large heavy sample and multiple samples can be set at once.
- Work table doesn't require a hole for elevation screw and do not need to choose the place to install the tester.

High resolution camera

- Camera resolution is selectable 1.3M pixel and 5M pixel (option).
- 1.25x object lens can be optionally adopted.
- 1.25x object lens can perform the high precision alignment in wide area which wide view camera cannot perform.

Sample surface inclination/slope correction function

- Z axis shall be controlled along with surface inclination by selecting 3 positions' angle setting.
- This function is to improve the accuracy of load apply and measurement position. Moreover to shorten the auto focus time, and prevent accidental contact of sample and lens/indenter. (Built-in safety device).

Measurement image saving function

- Measured indentation image can be checked quickly. Easily and quickly edit the data by re-measuring the saved image.

Large motorized XY stage

- Built-in large stage.
- It can be prevented the inclination of stage which shall be created by large heavy sample, and performs highly accurate load apply. It is also quiet.
- It is possible to move the stage to the center by double clicking and move the stage finely by dragging. Easy to align the sample's original position and it can drastically shorten the setting time.

Various measuring pattern

- Fully automated test cycle (indent, measuring, recoding data) by selecting measuring pattern.
- Random measuring combined with sample profiling function, and measuring function which traces edge of sample as standard feature.

Function which traces edge of sample as standard feature

- Straight/Zigzag/Circle/Arc/Line Set/Random/Matrix/Teaching etc...
- We will meet users' needs.

Image processing software

- Capability of reading unclear indents on un-mirror surface has been improved by more advanced image processing software.

Various data output format and statistical processing

- For the measuring of carburizing / induction hardening, the selected hardness case depth shall be displayed and recorded on the chart once the multiple measuring is completed.
- Multiple measuring data, Hardness chart, Case depth, Max. value, Min. value, Mean value, Dispersion, Standard deviation, OK-NG criteria, Conversion data etc... various data output shall be available.
- Display and output of color profile picture linked with hardness values are standard function.
- Excel data transfer function. Test result shall be exported to the original report Form.

DISTANCE & ANGLE MEASUREMENT FUNCTION

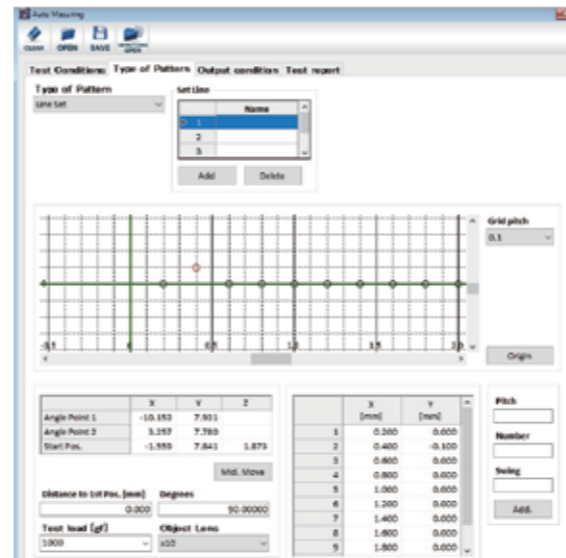

Only click between two points can measure the distance and click three points can measure the angle easy.

IMAGE OF PROFILING FUNCTION

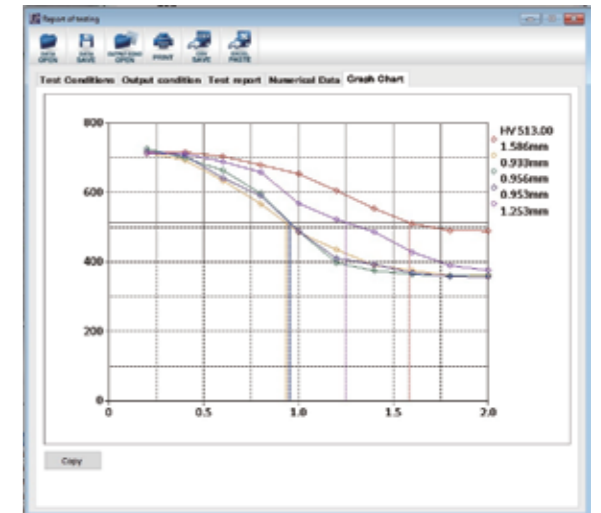

The original position set is very simple by this function to recognize a shape of sample automatically.

PATTERN SETTING

Easily set the complicated pattern by clicking a graph. Test load and measurement lens can set it at a Line of each.

REPORT GRAPH CHART

Measurement data can save it in CSV form and transfer it to an original report.
